SUMMARY

Innovative Senior Software Engineer with 5 years of experience specializing in enterprise web application development at Excelencia ITech Consulting. Engineered enhancements in system and deployment performance, notably improving system throughput by 30% and reducing deployment time by 60% through CI/CD automation. Seeking opportunities to drive impactful solutions leveraging expertise in Java, Spring Boot, and microservices, enhancing software delivery efficiency and regulatory compliance.

EXPERIENCE

Senior Software Engineer

Excelencia ITech Consulting

July 2025 - Present, Chennai, INDIA

- Owned end-to-end design, development, and production support of 10+ enterprise web application modules using Java, Spring Boot, and Vue, improving system throughput by 30% and increasing release stability across bi-weekly deployments.
- Led Vue 2 → Vue 3 migration for 50+ legacy components, refactoring architecture and improving maintainability while reducing UI load time by 25%.
- Implemented performance optimizations across REST APIs and UI workflows, reducing response latency by 40% in high-traffic modules supporting 5K+ daily users.
- Designed and implemented SOX compliance controls including audit logging, access validation, and transaction traceability, ensuring 100% regulatory compliance across financial workflows.
- Collaborated with Product, QA, DevOps, and business teams across 4+ cross-functional squads to deliver 20+ sprint releases annually, reducing production defects by 35%.
- Recognized as Top Performer of the Month among a team of 15+ engineers for delivering 3 critical enterprise features ahead of schedule under tight timelines.
- Integrated third-party authentication providers using OAuth2 and SAML, enabling secure single sign-on for 3+ enterprise clients and improving user onboarding efficiency by 40%.

Software Engineer

BI WORLDWIDE

February 2023 - July 2025, Chennai, India

- Developed and enhanced scalable Java backend services supporting enterprise engagement platforms used by 3K+ active users, improving service reliability and handling 20% higher transaction volumes.
- Executed legacy system modernization and Java migration initiatives across 5+ modules, improving application scalability and reducing maintenance effort by 30%.
- Optimized REST APIs through query tuning and service refactoring, reducing average response time by 35% and improving response consistency across high-usage endpoints.
- Collaborated with Product, QA, and DevOps teams across 3+ cross-functional teams to translate business requirements into reliable technical solutions, contributing to the successful delivery of 10+ sprint releases annually.
- Provided post-release production support by resolving 20+ incidents and implementing preventive fixes, improving platform stability and reducing recurring production issues by 40%.

Software Engineer

Thirdware Solutions

October 2020 - January 2023

- Delivered customer-centric enterprise solutions by translating client requirements into scalable Java-based implementations across 5+ application modules, improving feature delivery timelines by 30%.
- Partnered with product managers, business stakeholders, and UX teams to design and implement 10+ robust, user-friendly application features, improving overall user adoption and workflow efficiency.
- Ensured high code quality and performance efficiency by implementing best practices, code reviews, and optimized service logic, reducing production defects by 35% and improving application stability.
- Mentored and guided 4+ junior developers while enforcing coding standards and development best practices across modules, improving code maintainability and accelerating feature delivery cycles.

PROJECT

Albatross- Enterprise Modernization

Sunpower • July 2025 - March 2026

- Led end-to-end migration from Vue 2 to Vue 3 across 50+ UI components with minimal production downtime, ensuring uninterrupted service during release cycles.

- Improved application responsiveness and maintainability by redesigning 30+ reusable components, reducing UI load time by 25% and improving development efficiency.
- Implemented SOX compliance mechanisms including audit logging, access validation, and transaction tracking, reducing audit observations by 40% and ensuring regulatory compliance across financial workflows.

honeycomb

BI Worldwide • February 2023 – July 2025

- Migrated backend services from Java 8 to Java 11 across 12+ microservices, improving application performance and enabling access to modern JVM features.
- Ensured seamless compatibility with a distributed microservices architecture by updating dependencies, validating APIs, and conducting integration testing across 8+ services, reducing post-migration issues by 30%.
- Coordinated cross-team validation with QA, DevOps, and backend teams to maintain service continuity during the upgrade, successfully supporting 5K+ daily transactions with zero critical production downtime.

Nackle

Bi Worldwide • December 2024 – June 2025

- Built a full-stack platform using React, Node.js, Redis, and Docker to support 1K+ users, enabling scalable feature delivery and improving system performance by 30%.
- Designed and implemented a Customer Loyalty Program managing 10K+ customer reward transactions, including points tracking, rewards redemption, and promotional offers, improving customer engagement by 25%.
- Integrated GitLab vulnerability dashboards and automated security scans, identifying and resolving 50+ potential vulnerabilities and improving overall application security posture.

Daymaker

BI Worldwide • February 2023 – December 2024

- Fixed critical bugs and implemented enhancements for filtering cards and categories in a legacy Java-based system, improving feature accuracy and reducing user-reported issues by 30%.
- Analyzed legacy codebase and refactored filtering logic to improve maintainability and reduce processing time for category queries by 25%.
- Collaborated with QA and product teams to validate bug fixes and enhancements, ensuring successful delivery of 5+ feature improvements during sprint releases.

Ford Credit

Thirdware Solutions • October 2021 – January 2023

- Developed and implemented ORM frameworks using Hibernate integrated with Spring Data to manage 20+ database entities, improving data access performance by 30% and simplifying backend data management.
- Led the design and deployment of an EDU platform by translating client requirements into scalable application features, delivering 10+ functional modules that improved user experience and platform usability.
- Optimized Java server-side code by conducting vulnerability assessments and security testing, identifying and resolving 15+ potential security issues and improving application security compliance.
- Resolved 40+ application bugs and performed ongoing maintenance to ensure product stability, reducing recurring production issues by 35% and improving overall system reliability.

Headspin

Thirdware solutions • October 2020 – November 2021

- Analyzed and interpreted application requirements to align testing strategies with client objectives, defining test plans for 5+ application modules and improving defect detection efficiency by 30%.
- Automated mobile application testing based on client specifications, increasing automated test coverage to 70% and reducing manual testing effort by 40%.
- Developed Python automation scripts using the Appium framework to execute end-to-end mobile test scenarios across 100+ test cases, improving regression testing speed by 35%.

EDUCATION

MBA/PGDM

Madras University • Chennai • 2021 • 6.9/10

B.Tech/B.E.

TJS Engineering college • Thiruvallur • 2019 • 7.12/10

CERTIFICATIONS

Modern Java – Mastering Features from Java 8 to Java 21

Coursera • 2026

Core and Advanced Python Programming

Skillync • 2023

Angular JS Program

Udemy • 2020

SKILLS

Java, Spring Boot, Hibernate, Core Java, Docker, RDBMS, Postgresql

Vue, React, Angular,Python

Microservices architecture, Git,
Postman

MySQL, SQL for Data Science
